Trusted Learning From the Ground Up: Fundamental Data Governance Policies and Procedures

NOVEMBER 2019
What is the difference between a policy and a procedure?

Policies and procedures are not interchangeable. Policies set the tone and articulate the high-level requirements, while procedures give action to policies.

- **Policy** *(why we do it)* – A policy is a set of guiding principles or rules intended to influence decisions and actions.
- **Procedure** *(what we do and how we do it)* – A procedure describes the actions an organization performs in order to achieve the policy result. Organizations may use various terms to further define this function.

**Policies vs. Laws**

Some policies address the district’s commitment to abide by a given federal or state law. These should not restate the law, but rather articulate the district’s compliance requirements. Each such policy should be accompanied by procedures that detail how the district will abide by those requirements. For example, FERPA has a number of annual requirements including that schools must notify parents of their rights under FERPA, describe how they define a school official, explain what data they consider to be directory information and how parents may exercise their rights under FERPA. While there may be a policy in place articulating the school system’s commitment to comply with these requirements under FERPA, each of the specific requirements needs an accompanying procedure to detail what employees are to do in order to ensure that the school system executes on each of those requirements. In addition to FERPA, there are other applicable federal laws as well as more than 125 state student data privacy laws.

**Policies vs. Standards**

Standards are formally established, quantifiable requirements that apply to processes, actions, and configurations. A standard can be internal to the organization or external, such as an industry, association, national, or international standard (e.g. NIST, ISO).

**Student Data: Family Educational Rights and Privacy Act**

<table>
<thead>
<tr>
<th>Annual Notice of Rights that includes:</th>
<th>We have a procedure in place that details who is responsible for updating the notice annually as needed, sending it, tracking responses and conducting any necessary followup.</th>
</tr>
</thead>
</table>
| Definition of School Official | - In addition to a definition, school systems should provide clarity on who within the district has the ability to designate a third party as a school official.  
- Many school systems already have clear policies on who is authorized to sign a contract on behalf of the district and may benefit from having consistent policies for this for both free and paid services.  
- [Model Annual Notification](https://www.ed.gov/about/offices/list/privacy-technical-assistance-center/mannual-notification) (PTAC) |
| Definition of Directory Information and Opt-Out process | - See the [CoSN Privacy Toolkit](https://www.cosn.org/resources/privacy) for guidance on the use of a limited directory information policy.  
- Be aware of the requirements surrounding the use of student ID as an electronic identifier (username).  
- Note that some states have additional requirements related to the release of directory information.  

**Examples**  
- [Baltimore County Public Schools](https://www.bcps.org) (MD)  

---

1 The Future of Privacy forum maintains a [list of state student privacy laws](https://www.futureofprivacy.org/). There are also a number of organizations that track state Education legislation. For example, in Virginia, the [Virginia Association of Secondary School Principals](https://www.vassp.org) track bills in progress as does the [Virginia Department of Education](https://www.doe.virginia.gov).  
2 The US Department of Education has stated that “Schools and districts should be clear with both teachers and administrators about how proposed online educational services can be approved, and who has the authority to enter into agreements with providers”
| **Parental request to inspect/amend/correct errors in the education record and request a hearing** | **Procedure for responding to parent requests to exercise their rights under FERPA or state law** | - FERPA requires that schools fulfill a parent’s request within 45 days. Some states impose a shorter time limit.  
- Parents whose children receive services under the Individuals with Disabilities Education Act (IDEA) may have additional rights regarding their child’s education records. |
|---|---|---|
| **Release or posting of student work** | **Procedure and form for Media Release/Posting of Student Work** | As with directory information, school systems should provide clear guidance to staff on the policies for posting student work, to district websites, media outlets and other third parties.  
**Examples**  
- Cambridge (1, 2) |
| **Disclosure to military recruiting officers/opt-out** | **Military recruiting officers/opt-out process/form** | **Access to High School Students and Information on Students by Military Recruiters (PTAC)** |
| **Requests for Directory Information** | **Procedures for responding to requests for directory information** | **Guidance**  
- Is opt out information stored in a location accessible to those responsible for fulfilling directory information requests and to teachers so they may refer to it prior to posting photos that include students? |
| **Student Information and Social Media** | **Procedure for any required approvals prior to posting, requirements to obtain parent approval and/or a checklist for ensuring the use case complies with policy and does not conflict with directory information restrictions.** | **Examples**  
- Denver (1, 2)  
**Guidance**  
- Fairfax  
- Common Sense Media |

### Use of Student Data for Studies, Audit or Evaluation and other Research

| **FERPA Studies Exception Policy** | **Procedure for qualifying the recipient and approving data sharing. May include forms, contracts/data sharing MOUs, the method of securely transferring the data, and restrictions on use.** | - FERPA Exceptions (Studies) Video  
- Model Written Agreement Checklist (PTAC)  
- Written Agreement Guidance (PTAC)  
- Case Study: High School Feedback Report (PTAC) |
| **FERPA Audit or Evaluation Exception (including establishing approval authority)** | **Procedure for qualifying the recipient and approving data sharing. May include forms, contracts/data sharing MOUs, the method of securely transferring the data, and restrictions on use.** | - FERPA Exceptions (Audit or Evaluation) Video (Utah)  
- Model Written Checklist (PTAC)  
- Written Agreement Guidance (PTAC) |
| **Other Research not covered by FERPA Studies or Audit Exceptions (includes, but not limited to: External academic researchers; journalists; teacher dissertations; articles or action research; vendor “white papers; nonprofits and advocacy groups** | **Procedure for qualifying the recipient and approving data sharing. May include forms, contracts/data sharing MOUs, the method of securely transferring the data, and restrictions on use.** | **Policy should clearly define who has approval authority.**  
**Examples**  
- Dysart Unified School District  
- Fairfax County Public Schools  
Policies and procedures may also be needed to provide guidance for staff members in the event that they would like to use data for research purposes that are external to their job (such as writing a thesis, dissertation, etc.), including the process for obtaining prior approval. |
| Protection of Pupil Rights Amendment (PPRA)¹ | Procedures for reviewing student surveys, audits and evaluations to determine if PPRA applies; procedures for providing notice and handling opt/out. | Policy

- PPRA Model General Notice of Rights (PTAC) |

Many public and private nonprofit organizations, including community-based, professional, and faith-based organizations partner with schools and LEAs to administer vital academic, social, recreational, and vocational programs to students during the day, after school, and during the summer.

- Guidance on Sharing Information with Community-Based Organizations (PTAC)

Note that states may have additional laws related to school-affiliated entities. |

| Data Sharing with Community Organizations | Procedure for qualifying the recipient and approving data sharing. May include forms, contracts/data sharing MOUs, the method of securely transferring the data, and restrictions on use. | Technology Application Approval, Acquisition and Contracting Authority

Application Acquisition Approval Process²; Data Protection/Confidentiality Agreements

Strong policies and processes for the approval of applications that collect, store and use student data is a key component in maintaining direct control of a third party under the FERPA school official exception. In creating these policies and procedures, schools articulate who has the ability to designate a technology provider as a school official for purposes of sharing education records.

School system policy should also clearly define who has the authority to contract on behalf of the district for both free and paid services. The policy should address agreements that require a written signature and those that are binding via clicking online to agree.

**Example Approval Process**

- Raytown Quality Schools Data Governance Manual, Appendix C
- Raytown Quality School, authorized signatures policy
- Raytown Quality School, free resources
- Denver Public Schools

**Guidance**

Data protection agreements (DPA) should be drafted and adopted by each district in coordination with their general counsel, and based on applicable federal and state laws and district policies. Districts may wish to consult the following resources when crafting or adopting a DPA.

- CoSN Privacy Toolkit Suggested Contract Clauses
- PTAC Model Terms of Service
- Student Data Privacy Consortium |

### Guidance and Resources
- Data Breach Response Training Kit and Exercise (PTAC)
- Data Breach Response Checklist (PTAC)
- Data Security and Breach Notification Best Practice Guide (Kentucky)
- Data Security Guide (NSBA/COSA)
- CoSN brief on Cyber Insurance
- CoSN Privacy Toolkit (see section titled, “Contracts and Terms of Service”) (CoSN)

**Example Communication**
- Frederick County Public Schools (MD) Example of communication surrounding a data breach, including FAQ, sample letter, details on identity theft and risk mitigation. Your communications may vary depending on the nature of the particular incident. Your incident response communications should be written in close consultation with counsel and align with your legal requirements.

<table>
<thead>
<tr>
<th>Device Management/Security Policy</th>
</tr>
</thead>
</table>

**Questions to ask:**
- Consider if and when it is appropriate and legal to require certain password standards, security configurations, and the ability to enable lost-device tracking on staff or student-owned devices, and how administrative activation of this (or any other remote monitoring feature) will be managed and audited.

<table>
<thead>
<tr>
<th>Disaster Recovery Plan</th>
</tr>
</thead>
</table>

### Disaster Recovery and Business Continuity Policy
- Disaster recovery plan, inclusive of checklists, internal communications requirements, testing standards and schedules.

**Guidance and Resources**
- CoSN Technology Recovery Checklist (members only resource)
