

Effective Technology Professional Development

THE SECRET SAUCE FOR SUCCESSFUL CLASSROOM TRANSFORMATION

THREE CRITICAL GUIDELINES for professional learning that improves classroom practice

1
Focus on specific content areas

2
Provide opportunities to engage in hands-on learning

3
Directly connect experience to daily practice

FACTORS SCHOOL LEADERS MUST CONSIDER when planning for & evaluating professional learning opportunities

- There is a direct correlation between the formation of dedicated learning communities and instructional improvements.
- Teachers need to be engaged in sustained social learning with mentors and peers.
- Professional learning should not be limited to prescribed workshops or independent activities.
- Educators require a combination of focused instruction, opportunities to test out concepts, and a chance to gain meaningful feedback from colleagues.

CoSN recognizes professional learning as a critical component to improving digital literacy and technology capacity for educators, administrators, and students. Viewing it as a necessary component for addressing digital equity and launching K-12 innovation, CoSN advocates that district leaders consider professional learning as a component of all technology initiatives.

When it comes to maximizing technology tools for learning, professional learning for all educators requires a focus not only on specific tools but also on impactful changes in pedagogy which support the sustained, effective use of technology tools.
